

## SFTF NEPA Review Checklist

Instructions: This form must be completed for each operation at the South Florida Testing Facility, including SFOMC partners, with the potential to impact the environment. This includes but is not limited to range operation, site maintenance and minor construction, and major site improvements and/or modifications. This form must be submitted to the site environmental manager prior to the operation, and during the project planning stage. This will allow sufficient time for environmental review and any necessary documentation.

Project POC \_\_\_\_\_ Phone Number \_\_\_\_\_ Code/Org \_\_\_\_\_

Proposed Action (brief description, attach test plan if available) Repetitive?  Yes  No

Location of Proposed Action

60 ft range  600 ft range  1200 ft range  Off-site   
Location: \_\_\_\_\_

Proposed Start Date \_\_\_\_\_ Completion Date/On-going Operation \_\_\_\_\_

Category (check all that apply)

ISE  R&D  T&E  Test Facility M&R  Fleet Support  
 Base Operating Support  Acoustics  Construction  Other:

NEPA Documentation was done externally (attach copy)

For acoustic operations, provide the following:

Passive  Active

Source frequency (kHz): \_\_\_\_\_ Source output level (dB/ $\mu$ Pa at 1 meter): \_\_\_\_\_  
If classified, provide range of frequencies and/or range of source levels that include project

Source directivity: \_\_\_\_\_ Length of transmission, duty cycle, etc.: \_\_\_\_\_

Any other acoustic characteristics that may aid in environmental analysis: \_\_\_\_\_

Will diving (SCUBA, surface supply) be required during any phase of project?  Yes  No

If yes, explain nature of diving operation and short description of requirements (Attach additional description if required) : \_\_\_\_\_

Signature of Project P.O.C.

Submission Date
